Subject: Senior Program Manager

Dear Hiring Team:

As an enthusiastic team player, I have a solid track record of exceeding customer expectations and delivering on departmental objectives. I apply a consultative approach to my work while ensuring all parties are consistently updated on progress and milestones. I'm an agile coach with experience in delivering corporate training and workshops for SCRUM and SAFe methodologies. I would make a great addition to your team and look forward to the next steps in the application process.

I am currently working as a Senior Program Manager at the Royal Bank of Canada. I am accountable for a significant role in delivering an enhanced, strategic, and consistent data infrastructure for Risk and Finance systems in a common compute platform of a \$2M budget. I work as a Delivery Manager, Program Manager, Integrator, Delivery Manager, and legacy roles as Technology Leads at RBC.

Prior to this, I've grown the Cognizant business for Scotiabank account from \$0 to \$4M in a year in 2021, a multi-year global reporting standards program contributed to a \$3M, multi-year product migration, and coordinated a \$3M PEGA level 2 currency upgrade. I was also involved in enhancing FATCA compliance into a global compliance platform. I leveraged project management methodologies to support the program requirements, managed project schedules, conducted weekly and monthly status meetings, and presented reports to stakeholders. Focusing on budget constraints ensured the projects adhered to client and company specifications and desired outcomes.

I worked on programs valued at \$10M and managed the delivery of program milestones across multi-faceted business structures. Through sound leadership and project governance, all programs were completed within the allotted time and within the budgeted resources.

Along with my work experience, I have an undergraduate degree in technology and completed numerous training certifications. In giving back, I do conduct several agile training workshops with RBC's agile COE for agile adoption at the enterprise level. I also accumulated a wealth of technical skills and was awarded for performance outcomes. I enjoy learning and look forward to adding additional capabilities to my portfolio of knowledge.

To complement my resume, I would like to speak about how I can further contribute to your team. When you contact me, we can discuss my qualifications and book an interview to review my competencies for this role in greater detail.

Regards,

Beni Shankar De
